Direction (Q.No 141 to Q.No.144) – Read the given passage and answer the questions.

Drug addiction is a chronic disorder that refers to the condition in which a person feels a strong need of drugs and can't keep from consuming the same. It is characterized by obsessive engagement in desired spur despite adverse consequences. The addictive stimuli are characterized by two factors – one is positive reinforcement and second is perceived to be intrinsically rewarding. A person develops and feels increasing pleasure in consuming drugs. The initial decision to take drugs is mostly voluntary for most of the people but with repeated use of drugs one develops the habit and deprives self control that eventually leads to dependency. The dependency and over consumption of drugs can lead to persistent brain changes. Long term use of drugs can also affect the brain functions that include behavior, learning, stress, anxiety and memory.
